

31 Jan. 2016

Dear Bureau of Land Management,

I want to file an objection to the proposal to lease land near Lake Lewisville for gas drilling. Gas drilling has caused a number of earthquakes in North Texas near this lake. The dam for Lake Lewisville is in poor condition and should this dam fail approximately 400,000 people would be in danger. The cost of repairing the damage would be in the billions of dollars.

I am concerned that this drilling is a clear and present danger to the people who live down river of this dam.

Sincerely,

A handwritten signature in black ink, appearing to read "Stan Aten". The signature is written in a cursive, flowing style.
